Key Growth Drivers of Fastener Market in India.

The Indian industrial fasteners market is projected to reach USD 17,868 million by 2030, registering a CAGR of 7.9% during the forecast period (2023-2030).

The automotive sector in India is one of the largest consumers of industrial fasteners. Auto industry in India has recovered from the onslaught of coronavirus pandemic and is expected to witness more accelerated growth in the coming times.

Further, construction and engineering sector are key drivers of industrial market growth. High-tensile fasteners are mainly used in the construction and engineering sector, whereas mild steel fasteners are used in manufacturing automobiles.

Rising demand and increasing sales of automobiles in the country are fostering growth of the automobile sectorspecific fasteners. Use of fasteners in parts including engines, chassis, moulding, suspension system and wheels etc. are predicted to drive the growth of industrial fasteners market size.

Industry speaks

Fastener Fair is a very good event for the industry. During the show days, a number of customers visited our booth to explore our products and see product demos. Also, participating in events such as Fastener Fair always help us extend our market reach.
